## **DETAILED ACTION**

### ***Inventorship***

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

### ***Priority***

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-9 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Sinn et al (US 5,785,013). Sinn et al discloses pump-motor unit suitable for application as a coolant pump for an internal combustion engine of a motor vehicle, whose

volumetric flow of coolant is controlled as a function of the temperature of the internal combustion engine by pulse width modulated control signals. See col. 3, lines 43-67.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-10 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Davies (US 6,425,353) in view of Hotta et al (US 6,199,528).

Davies shows everything except for generating heat at the phase windings for warming-up the cooling liquid if a temperature thereof is below a set value. Hotta et al shows generating heat at the phase windings for warming-up the cooling liquid if a temperature thereof is below a set value (col. 1, lines 42-46). It would have been obvious to a person having ordinary skill in the art to modify Davies by employing generating heat at the phase windings for warming-up the cooling liquid if a temperature thereof is below a set value in order to warm-up the engine in shorter time period.

Claims 11-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Davies (US 6,425,353) in view of Hotta et al (US 6,199,528) as applied to claims 1-10 and 14 above, and further in view of Plener et al (DE 100 58 374). Plener et al shows electrical devices 5 arranged in the cooling fluid circuit. It would have been obvious to a person having ordinary skill in the art to further modify Davies by employing electrical

devices arranged in the cooling fluid circuit in order to warm-up the engine in shorter time period.

### **Conclusion**

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references by Pawellek et al discloses electrically driven coolant pump.
